Thrush Aircraft Adds Authorized Service & Support Facility In Canada

ALBANY, GA – Thrush Aircraft is proud to announce that Yorkton Aircraft Service Ltd. is the newest authorized service and support facility to join the Thrush Aircraft service network.

“Thrush Aircraft stands for the very best in ag aviation and having Yorkton Aircraft join our service network in Canada is a reflection of Thrush’s hard – earned reputation and expanding market in Canada and North America.” said Thrush Aircraft’s President, Payne Hughes.

Yorkton Aircraft is located in the heart of Canadian agriculture lands at Yorkton, Saskatchewan and is owned and operated by Allan and Cheryl Denesowych. Yorkton Aircraft has over 22 years of experience in aircraft service and maintenance and is the largest Ag maintenance and parts facility in Canada. Yorkton Aircraft has a strong customer safety and customer service reputation. Their knowledgeable maintenance and technical team have been providing support and service to Thrush operators in Canada for years.

“When we first started our business, we were a recognized service center for the Thrush product line of agriculture aircrafts,” explains Cheryl Denesowych, “we are excited to regain our association with the Thrush factory and its management. It is clearly an advantage to our team and to the Thrush owners and pilots when we have direct access to the manufacturer.”

Yorkton Aircraft Owner and Director of Maintenance Allan Denesowych states, “Our number one priority at Yorkton is safety, and second is to work with ag operators to minimize their downtime with our quick, reliable, and professional service. The Thrush aircraft is well respected for its durability and Thrush’s commitment to their customers was a perfect fit for our business and the support we provide to ag operators in Canada every day.”

About Thrush Aircraft Company

Headquartered in Albany, Georgia, Thrush Aircraft manufactures a full range of aerial application aircraft used in agriculture, forestry and fire fighting roles worldwide. Founded in 2003, Thrush is well-known for building the most durable aircraft in the aerial application industry, as well as the best flying – from both pilot and operator perspectives. All Thrush models provide superb visibility, light control response, and a high degree of maneuverability and speed, along with superior efficiency and low direct operating costs. Today there are more than 2200 Thrush aircraft operating in some 80 countries around the world.

About Yorkton Aircraft

Yorkton Aircraft Service Ltd. was incorporated in 1989 by husband-wife team Allan & Cheryl. The two owners are actively involved in every aspect of this company. Many of their staff members have been part of the team for 10-years or more. Allan and Cheryl are very proud of their team - they are dedicated and loyal individuals to the company and the clients they serve. They pride themselves on keeping their customer in the air.
